ERS's applied against monthly base charges for each customer are determined by the greater of : (1) the number of ERC's as determined using American Water Works Association (AWWA) standard meter size equivalencies, as shown in the table below.

AWWA Meter Equivalencies

<u>Meter Size</u>	<u>Equivalency</u>	<u>Meter Size</u>	<u>Equivalency</u>
5/8-inch x 3/4-inch	1.0	3.0-inch	16.0
3/4-inch	1.0	4.0-inch	25.0
1.0-Inch	2.5	6.0-inch	50.0
1.5-inch	5.0	8.0-inch	80.0
2.0-inch	8.0		

or, (2) the number of ERC's as determined using metered potable water usage. The level of service for one water ERC is 300 gpd/ERC or approximately 9,000 gallons per month. If over any 12-month period, the city audits a customer who exceeds the average by 100% or over approximately 18,000 gpd average, then for each 9,000 gallons per month or increment thereof another ERC of system capacity fees for water or wastewater will be due and payable. The customer may pay the current system capacity charges for the number of additional ERC(s) determined or pay the additional capital recovery charge on the monthly bill until the then system capacity charge is paid within 240 payments plus five percent interest.
