Heat Advisory

As the summer officially begins, please be mindful that the temperatures are extremely dangerous. The combination of hot temperatures and high humidity to create a situation in which heat illnesses are possible. If you work or spend time outside, if possible, reschedule strenuous activities to early morning or late evening. Familiarize yourself with the signs and symptoms of heat exhaustion and heat stroke. Wear light weight and loose fitting clothing when possible, wear sunscreen and **DRINK PLENTY OF WATER.**

2019 Hurricane Basic Preparedness Tips

- Know where to go. If you are ordered to evacuate, know the local hurricane evacuation route(s) to take and have a plan for where you can stay. Contact your local emergency management agency for more information.
- Put together a go-bag: disaster supply kit, including a flashlight, batteries, cash, first aid supplies, medications, and copies of your critical information if you need to evacuate.
- If you are not in an area that is advised to evacuate and you decide to stay in your home, plan for adequate supplies in case you lose power and water for several days and you are not able to leave due to flooding or blocked roads.
- Make a family emergency communication plan.
- Many communities have text or email alerting systems for emergency notifications. To find out what alerts are available in your area, search the Internet with your town, city, or county name and the word "alerts."
